

SUMMARY OF THE RESPONSE TO THE QUESTIONNAIRE FOR A THIRD DAY STAPP CONFERENCE  
PROGRAM ON HUMAN SUBJECTS FOR BIOMECHANICAL RESEARCH

J. W. Melvin, Head, Biomechanics Group  
Highway Safety Research Institute  
Ann Arbor, Michigan

There were thirteen responses to the questionnaire sent out last spring (1974). There were four questions which could be tabulated as to response.

They were:

Question 1. Would you like to see a formal meeting with papers?

There were 6 Yes and 7 No. Of the 6 Yes votes, all were in favor of a one-half day meeting as opposed to a full day meeting.

Question 2. Would you like to see an informal workshop session?

There were 11 Yes votes and 1 No. Of the 11 Yes votes, 7 were in favor of a one-half day session, while the remaining 4 were in favor of a full day session.

Question 3. Would you plan to participate in the meeting?

There were 11 Yes votes and 2 No votes.

Question 5. Do you think that a continuing formal association of persons interested in the topic of human subjects in biomechanical research is warranted?

There were 6 Yes votes and 7 No votes.

Thus, if the thirteen responses represent a general sample of the group, we can see that an informal working session with active participation as the main theme of the group. Whether or not a formal continuing association is desired is a matter of close debate and will have to be resolved as time goes on.
